INSTRUMENT & IMC RATING

In order to receive an Instrument Rating all pilots need to successfully demonstrate the following procedures

1. Entering and taking up a hold on an NDB, a VOR and a given FIX
2. RNAV Approach
3. VOR Approach
4. ILS Approach
5. NDB Approach
6. Carry out a missed approach

All procedures are to be conducted in IMC with a cloud base not lower than the published MAP. Where an approach is undertaken this must be followed by a successful landing.

Requirements for the IMC Rating, pilots need to demonstrate the following procedures.

1. Track a given route by use of Radio Beacons
2. Carry out a diversion to a given position and orbit over said position
3. Successfully carry out two approaches using different approach aids of pilots choice

All procedures for the IMC are to be conducted in IMC with a cloud base not lower than 1000ft AGL and not higher than 3000ft AMSL
